Employment

[LearnChamp Consulting GmbH <https://www.learnchamp.com>](https://www.learnchamp.com) | 2020-08-01 - Today

Senior Full Stack Engineer

As a Senior Full Stack Engineer at LearnChamp my responsibilities were technical product development, improvement to processes and introducing new tools into the company.

- Planning and implementation of customer-specific integration solutions
- Internal development for R&D projects (AR/VR, chatbots, automatic testing,...)

[LearnChamp Consulting GmbH <https://www.learnchamp.com>](https://www.learnchamp.com) | 2017-06-01 - 2020-08-01

IT Lead & Solution Architect

As an IT Lead at LearnChamp I took over the responsibility for our whole infrastructure. This included the physical hardware for our datacenter and the equipment for our employees. I was also tasked with maintenance and improvement of the virtual server landscape. During this time I was managing two employees. One working in desktop support and the other working on our linux infrastructure.

- Consulting and conception of solution architectures based on customer-specific requirements
- Design and implementation of a hosting solution in AWS
- Overall support of the internal IT infrastructure (Windows server, Linux server (Debian), VMWare, Veeam, Atlassian Cloud, Nextcloud on-premise, Gitlab on-premise)
- Supervision of desktop support staff (3rd level); development of scripts for software distribution; support of an asset management solution (Lansweeper); Rollout O365
- Conception and implementation of a DevOps strategy
- Development of integration solutions to internal systems
- Support of the second office-location in Germany

[LearnChamp Consulting GmbH <https://www.learnchamp.com>](https://www.learnchamp.com) | 2014-01-01 - 2017-06-01

Technical Consultant

During my time at LearnChamp, integrations between different (cloud) products in customer projects were always in demand. As an experienced developer, I took on these tasks. I also started working in IT.

- Design and implementation of customer-specific integration solutions

[LearnChamp Consulting GmbH <https://www.learnchamp.com>](https://www.learnchamp.com) | 2012-11-01 - 2013-12-01

Associate

In this role, I was able to implement web programming within the learning management system (LMS) Totara. This ranged from front-end creation of themes to new plugins and integrations with third-party systems.

- Implementation of custom designs for the LMS Totara
- Implementation of customizations for the LMS Totara
- Configuration of the LMS and ongoing customer support

[nexxar GmbH <https://www.nexxar.com/>](https://www.nexxar.com/) | 2010 - 2010

Web development intern

My tasks consisted of creating pixel-perfect implementations of digital business reports. The focus here was very much on performance and compatibility with a large number of browsers / browser versions.

- Implementation of customized designs as digital business reports
